

Escrow Shortage Notice (Tax) Setup

The Escrow Shortage Notice (Tax) Setup is used to define the message that will be printed on the escrow notices. This would be used by credit unions with the Mortgage Processing optional software package.

The screenshot shows a software window titled "Datamatic VIEW" with a close button (X) in the top right corner. Below the title bar is a blue header area containing the text "Escrow Shortage Notice (Tax) Setup" and two icons: a help icon (question mark) and a print icon. The main content area is light gray and contains five text input fields, each preceded by a label: "Line 1:", "Line 2:", "Line 3:", "Line 4:", and "Line 5:". At the bottom right of the window, there is a "Save" button with a blue border.

Figure 1

Enter the information to be printed on the escrow notice for taxes starting with line 1. Use as many lines as are needed. There is a maximum of 35 spaces allowed for each line. When finished, select Save to save the changes.

The notices are generated for the members who do not have enough money in the escrow account to pay the tax or insurance.
