GAP TITLE SETUP

Overview

GAP Title Setup allow credit unions to defined GAP products. This can eliminate the need for loan officers to remember pricing when the credit union has multiple GAP Products.

Credit Union can specify a GAP amount and the credit union surcharge for GAP. The two amount fields allow the Credit Union to post to specific Ledger Accounts. The specified ledger accounts can be setup in Automated Transaction Setup in System Settings. The Automated Transaction Setup has a field for GAP Insurance which would be the Amount field on this setup. The field called GAP Insurance to CU would be the CU Amount. If credit union uses only one GAP Ledger account, the total amount of GAP would only be entered in the Amount Column.

GAP Title selections are available in following areas:

- Loan Application
- Loan Documents

The GAP Title Setup is in the [Main Ribbon > System Settings > GAP Title Setup].
