

Membership Agreement Setup

The Membership Agreement Setup is used to select whether or not certain sections or windows will be displayed in the Print Membership Agreement wizard. This will allow some flexibility in the options that will display when a membership agreement is printed.

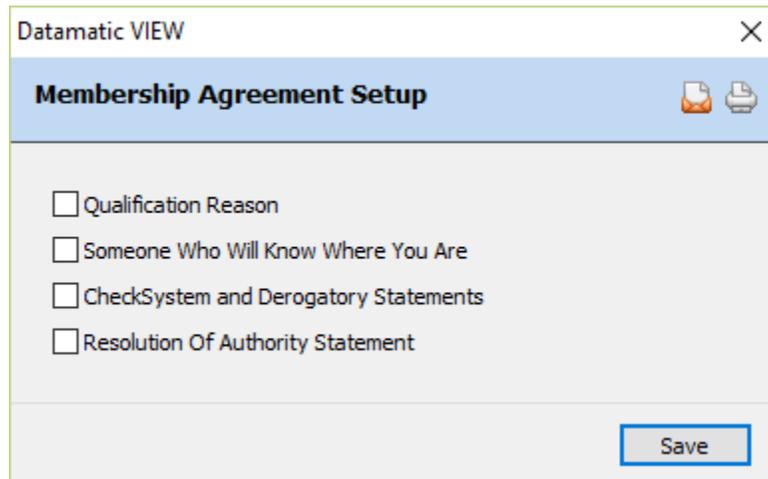

Figure 1

Either use the arrow keys to highlight the option and press the spacebar or click on the option. This will put a checkmark to the left of the option. When finished making selections, select Save.

The selected option(s) will show on the Print Membership Agreement wizard for selections to be made or information to be entered.

****Note:** The **Resolution of Authority Statement** selection is for credit unions that use VIEW to print a Membership Agreement for organizations/businesses.
