

## Stations

The Stations window is used to view the PC's that have been setup to access VIEW. Also, the receipt and check types for each workstation can be viewed on one window. If a description is entered on the Station Setup window, that will display on this window also. The Station Setup window is located by selecting [Main Ribbon > About VIEW] then clicking on the Edit button.

**\*\*Note:** In order to have access to the Stations window and access to the “Edit” button on the Station Setup window, the employee must be checked (for permitted) under [Main Ribbon > System Settings > Tellers > Specific Teller > System tab > Station Administration].

System Settings - Stations
